

HILINA ZEMEDKUN

Student

About Me

I am a dedicated software engineering student and coding enthusiast actively exploring various domains within software development and computer science field. My eagerness to dive into the creative aspects of programming drives my commitment to mastering the skills necessary for a successful career in the tech industry. I aim to contribute meaningfully to innovative projects and developments in the field.

Addis Ababa ,Ethiopia

Skills

- Python
- HTML5,CSS
- Java Script
- Java
- Basic of Database SQL
- Basic skill in flutter development

Education

Addis Ababa Institute of Technology

Addis Ababa Ethiopia

2022 - now

A high-achieving student in the Software Engineering program at Addis Ababa University, known for exceptional academic performance and a strong commitment to learning. Actively engaged in collaborative projects and extracurricular activities, demonstrating leadership and innovation in technology.

Udacity

2024

Certified upon completion of the Fundamentals of Android Development course, demonstrating proficiency in key concepts such as app architecture, user interface design, and data management.

Internships

STEM POWER INC

Debrezeit Ethiopia

JUNE 2024 - SEPTEMBER 2024

Project mentorship

In an effort to enhance the understanding of programming concepts among enthusiastic high school students, we implemented a comprehensive coding program. This initiative focused on several key programming languages, including Python and Processing, to provide students with a solid foundation in coding principles. Additionally, we conducted lessons on the application of microprocessors, demonstrating how to interface and control various sensors and hardware devices.

Interests

- Problem Solving
- Reading
- Traveling
- Volunteering

Projects

Healthy Tips mobile app

Collaborative project

Participated in the development of an application that provided individuals with first aid information during emergencies and assisted in identifying symptoms of various diseases.

School Management System

Collaborative project

Participated in a project to design and develop a Python-based system for managing student registration, grading, scheduling, and other essential functions required for school administration.
